To Whom It May Concern:

My husband and I just moved into a new home, and we were in the market for a new kitchen table. I love antiques, but my husband loves modern conveniences. We shopped for months before a friend told me about Ralph Gorham Originals. The concept was perfect, antique wood crafted into the table of our dreams.

When we visited Ralph's workshop, he took us through both the design and production processes. By the end of our visit, we had designed the table we had been shopping so many months for. The special treatment didn't stop there. Ralph consulted me during construction, as we adjusted specific measurements to fit my kitchen. He took extreme care to keep the character of the wood prominent, as he stained and polished the table to coordinate with chairs that we had already purchased. When I stopped by for an inspection of the color and finish, Ralph kept adjusting and re-doing until I was happy.

We are thrilled with the final piece of art that will serve as our kitchen table. Ralph truly is an artist in every sense of the word. His attention to design detail and craftsmanship is amazing. We were so pleased that we bought a Ralph Gorham Original end table for our family room. I would highly recommend his work to anyone, and would be happy to discuss it personally.

Sincerely,
